

QUALITY CONSTRUCTION THAT SPEAKS FOR ITSELF

BUILDING WITH INTEGRITY

**BSN METAL ROLL FORMING GROUP
STEEL FABRICATOR**

Khewat No-166, Khata Number -190, Khasra Number 34//23/3,
Village Gangtan, Jhajjar, Haryana: - 124107
(Opposite Shiv Mandir)

OUR PRODUCTS

1. TRAPEZOIDAL Profile Sheet

- **Material:** PPGI
- **Thickness:** 0.30-0.80mm
- **Surface Treatment:** Galvanized
- **Input width:** 1220-1450 mm
- **Length:** Bespoke
- **Usage/Application:** Roofing/Cladding
- **Manufacturing Technique:** Cold Rolled

2. SINUSOIDAL Profile Sheet

- **Material:** PPGI/GI
- **Thickness:** 0.30-0.80mm
- **Surface Treatment:** Galvanized
- **Input width:** 950-1350 mm
- **Length:** Bespoke
- **Usage/Application:** Roofing/Cladding
- **Manufacturing Technique:** Cold Rolled

3. CORNER Flashing

- **Material:** PPGI/GI
- **Thickness:** 0.30-2mm
- **Input width:** 950-1350 mm
- **Length:** 10 Feet
- **Usage/Application:** Corners
- **Surface Treatment:** Galvanized

ENABLE STRENGTH IN YOUR CONSTRUCTION WITH US!

WHY ROLL FORMING?

Roll forming is a cost-effective process for shaping metal coils into designed profiles. It is a continuous process that converts sheet metal into an engineered shape using consecutive sets of mated rolls, each of which makes only incremental changes in the form. We are processing color-coated galvanized coils into trapezoidal and sinusoidal profile sheets, along with sheet slitting and bending.

Connect with us for Roll Forming, Slitting, and Bending Services to ensure Uniformity & Similarity.

APPLICATION AND USAGE

These sheets are made of tough steel and are known for their durability and resistance to impact and corrosion. They are commonly used in residential and industrial applications for roofing, cladding and corners.

These sheets are resistant to corrosion and can withstand various temperatures and environmental conditions.

ENHANCE STRUCTURAL DURABILITY
